

## The Circus

By Sandy Kemsley

The circus is a lot of fun. It comes to town once a year. When you go to the circus what do you see? There are many animals in the circus. They do stunts and tricks. There are elephants and horses. There are lions and tigers.

The circus also has clowns and acrobats. There are people high on a wire. They walk across the wire to the other side. All eyes are on them. The people are quiet until they make it across. Then, they all cheer. Some circus performers swing on a trapeze. They are fun to watch, too.

Sometimes you get to eat cotton candy and peanuts. The cotton candy sticks to your mouth. Your teeth turn blue. It is so much fun.

Have you been to a circus? \_\_\_\_\_

What part of a circus would you like to see the most? Why?
