Floral Magnets

Make these silk flower magnets in a jiffy for your locker or as a gift for someone special's refrigerator.

What you will need:

Silk flowers
Beads or buttons
Strong magnets
Adhesive: Super tacky kid-safe glue in a tube
Glitter paint
Paint brush

1. Remove any plastic parts from flower and discard. This may make the flower come apart in layers.
2. Glue the flower in layers, if appropriate, onto the magnet.
3. Glue a bead or button into the center of the flower.
4. Add glitter paint, if desired, to the flower petals. Let dry.
5. Use the floral magnets on your locker or refrigerator, or give as a gift.
