

Name _____ Date _____

European Union: Countries and its Capital Cities

First proposed in 1950, the European Union was originally an economic integration among six countries. Several additions to the EU have been made throughout the years, and the integration has expanded from agreement on a few economic sectors to a unified approach to agricultural policies, consumer rights, and trade. In May 2004, the European Union expanded, and currently has 25 member countries.

Check your knowledge of the countries and their capital cities. HINT: The countries are listed in alphabetical order.

Complete the table:

Country	Capital City
Austria	
	Brussels
