

# Plants

## Center Activity

## Art

### Plant Collage

**You will need:**

*construction paper*

*plant materials - leaves, twigs, etc.*

*glue*

# Plant Collage

1. Go on a nature hike to gather plant materials, such as leaves, twigs, stems, seeds, flower petals and buds.
2. In the classroom, arrange your plant materials on a piece of construction paper to make a collage. Move objects around until you find a design you like.
3. Your collage may look like something real, or it may be abstract.
4. Once you decide on a final design, glue the plant materials in place.
5. Allow the glue to dry overnight. Then display your collage.
