

Instruction - Viewing Microsoft PowerPoint Presentations

You will enjoy a Microsoft Power Point presentation when viewed in full screen mode because it enables all the features programmed into the show. You will hear audio and see image changes that are timed or triggered by the “Enter” or “right arrow” keys on your keyboard.

You can view a presentation in full screen with either of these commands (vs. 2003 or earlier):

1. Go to toolbar on top, Left Mouse Click VIEW, Left Mouse Click SLIDE SHOW
2. Go to the bottom of the screen and Left Mouse Click the TV icon.
