## **DIRECTIONS**

**Suggested audience:** Primary

**Object:** Review words beginning with the letter h.

**Number of players:** 2

**Advance preparation:** Copy on heavier paper or mount on tagboard. Laminate for durability.

### **Game play directions:**

Mix up the dominoes and lay them face down in a pile on the table. Each player takes five dominoes. The dominoes should be hidden from the other player. The first player lays down a domino. The other player must lay down a match to one of the exposed ends of the domino played. The players can play off of any of the dominoes on the table. If a player does not have any domino that corresponds to one on the layout, that player must draw a new domino card. It is possible to play a "double", in which case the layout forms a T shape. Play can continue from any exposed end. Pass if there are no more dominoes in the pile. If both players pass, the game ends without a winner. The winner is the first person to run out of dominoes.

NOTE: Most other non-numeric double six domino variations should work with this deck.
