

## Juice Box Shelf Sitters

### Materials Needed:

- One empty juice box
- kitty litter or sand or rice beans
- Popsicle stick, construction paper, scraps of material
- pictures of people from magazines or your own photo

### Directions:

1. (For adults to do) Cut a slit in the top of the juice box and wash thoroughly and let dry.
2. Fill about 1/4 of the juice box with kitty litter or something that will give it weight.
3. Tape up the slit in the top of the box.

The box becomes the body for your shelf sitter.

- Decorate the juice box with scraps of material and buttons, or wrap it with construction paper and draw clothes on the paper.
- Stick a Popsicle stick in the top of the box (this will be the neck).
- For the head, you can use a picture of a face from a magazine or your own photo, or draw a face on a piece of paper.  
Glue the head onto the Popsicle stick.
- Add yarn for hair, etc. The legs can be made from strips of construction paper, crepe paper, or ribbon taped to the bottom of the juice box. Same for the arms.
- Add doll shoes or cut shoes from a magazine.

This project has great potential for any age group. When completed, set on the sitter on a shelf and let the legs dangle.
