Recycling Bag Storage Box

This craft makes a decorative place to store plastic shopping bags until you need to use them again. The shopping bags pull out of the box just like the facial tissues do.

What you will need:

Facial tissue box, empty
Contact paper in any design
Scissors
Pen

1. Cut away any plastic in opening of box. Discard plastic.
2. Lay tissue box on underside (paper-covered sticky side) of contact paper.
3. Pull contact paper around box to measure length needed. Mark with pen.
4. Cut contact paper straight across at marking.
5. Remove paper backing and place tissue box in center of contact paper.
6. Pull paper around tissue box on one long side. Repeat with other side.
7. Cut the contact paper on corners from outside edge down to block of wood. Fold ends in as you would a gift wrapped package. Press all edges down firmly.
8. Turn box right side up. You should be able to feel the edge of the opening in the box.
9. Cut around the inside opening of the box.
10. Store any plastic shopping bags inside the box.
